

Brainstorming & Idea Prioritization Template

Date	25 June 2026
Team ID	
Project Name	Smart Lender
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Sai Geethika Bourothu	Use standard Logistic Regression or Decision Trees for predicting loan approval	Machine Learning	1
2	Mohana Swaroop Kukkala	Use the XGBoost Algorithm to achieve much higher prediction accuracy.	Machine Learning	1
3	Suvvari Ankitha	Build the web application backend using a heavy framework like Django	Web Backend	2
4	Sai Geethika Bourothu	Build a lightweight, fast web application backend using Flask .	Web Backend	2
5	Mohana Swaroop Kukkala	Create a simple, basic HTML/CSS form for the user input screen.	UI/Design	3
6	Suvvari Ankitha	Create a Premium Dark-Mode Glassmorphism UI with interactive risk bands based on probability.	UI/Design	3

Brainstorming & Idea Prioritization Template

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
1	Machine Learning: Use XGBoost over basic algorithms to ensure the highest possible prediction accuracy for the bank	High	High	1	Yes
2	Web Backend: Use Python Flask to easily integrate the .pkl machine learning models directly into the web server.	High	High	2	Yes
3	UI / Design: Develop a premium, interactive Glassmorphism frontend that clearly displays the applicant's "Risk Band" based on probability.	Medium	High	3	Yes
